QUICK START GUIDE

DAILY CLEANING

Machine's Milk unit must be cleaned at the end of each day.
If cleaning missed, the machine will automatically block milk brewing until this has been completed.

① Press ② Pull down

- 1** Remove the milk pipe from the milk container and disassemble the milk unit from the machine.

- 2** Clean the parts under running water, being sure to use the brush provided to clean inside milk unit pieces.

- 3** Reassembly the milk unit and place into machine.

- 4** Press System Clean button and follow steps shown on machine display.

- 5** Place the milk tube in a container containing cleaning solution (8 Oz. min.). Place an empty glass under the spouts (12 Oz. min.). Press OK to confirm and start the cleaning procedure.

- 6** Place the milk tube in a container containing fresh water (8 Oz. min.) to rinse the system and complete the procedure. Machine is ready to brew your beverage.
